

Dear Chairman Powell and Commissioners,

I am deeply dissappointed in the way the airwaves have been centralized in the hands of the very few. We demand that more bandwidth be allowed for those of us who cannot compete with the rich corporations for freedom of speech. I am appalled at the direction the news has taken in it's dissemination of (very biased) information and protecting destructive advertizers by not publishing other opinions about products and company abuses of people. I am smart enough to see through all the lies in the ads. That is why i almost never vote dem or repub. Can't believe ANYTHING you here or see on tv. It's all the Brave New World and 1984 doublespeak. "The brainwashed do not know they are brainwashed". That is why I use computers mainly for activism to disseminate other views and expose the lies.
